

Bug ID	Located	Summary	Steps to Reproduce	Expected Result	Actual Result	Priority	Severity	Issue Type	Platform	Evidence	Reference Link
BS_001	Sign In	Forgot Password link is missing	1. Open the application. 2. Go to the Sign In page.	A 'Forgot Password' link should be visible under the password field.	No password recovery link is available on the UI.	High	High	UI/UX	Web		
BS_002	Sign In	Password masking toggle not working	1. Enter text in password field. 2. Click the eye icon.	The password should toggle between dots and visible text.	The icon is non-clickable; password remains hidden.	Low	Medium	Functional	Web		
BS_003	Sign Up	Weak Password Acceptance	1. Enter a 3-character password. 2. Click Sign Up.	Validation error: 'Password must be at least 8 characters'.	System allows registration with weak passwords.	High	High	Validation	Web		
BS_004	Sign Up	Email validation fails for missing '@' symbol	1. Enter 'incomplete@gmail.com' in email field. 2. Click Sign Up.	Should show 'Invalid Email Format' error.	Form is submitted without any validation error.	Medium	Medium	Validation	Web		
BS_005	OTP Page	Resend OTP timer stuck at 00:00	1. Wait for the OTP timer to expire. 2. Observe the 'Resend' button.	Timer should reset and button should become active.	Timer stays at 00:00 and button remains disabled.	High	High	Functional	Web		
BS_006	OTP Page	Accepts expired OTP codes	1. Wait for 5 minutes after OTP is sent. 2. Enter the code and submit.	System should show 'OTP Expired' error.	The system accepts the expired code and logs the user in.	High	Critical	Functional	Web		
BS_007	Onboarding	Progress bar does not update on Step 3	1. Complete Step 2 and move to Step 3. 2. Save button is unresponsive.	Progress bar should show 75%.	Progress bar remains at 25% throughout the flow.	Medium	Medium	UI/UX	Web		
BS_008	Editor	PDF Export link leads to 404 error	1. Generate a post. 2. Click the 'Save' button.	Post should be saved to the database.	Nothing happens upon clicking; no success message.	High	Critical	Functional	Web		
BS_009	Carousel	PDF Export link leads to 404 error	1. Click 'Download PDF' in Carousel Builder.	A PDF file should start downloading.	Redirects to a broken 404 page.	High	Critical	Functional	Web		
BS_010	Dashboard	Mobile Menu overlaps with Dashboard content	1. View dashboard on mobile (375px). 2. Open the sidebar menu.	Sidebar should overlay cleanly or push content.	Sidebar covers and obscures dashboard content.	Medium	High	UI/UX	Mobile		
BS_011	Dashboard	Low Mobile Performance Score (62/100)	1. Run PageSpeed on Mobile.	Score should be 90-100.	Mobile score is 62 (Orange).	Medium	High	Performance	Mobile	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c
BS_012	Dashboard	High LCP (Largest Contentful Paint) on Mobile	1. Observe PageSpeed metrics.	LCP < 2.5s.	LCP is significantly higher.	Medium	Medium	Performance	Mobile	https://lighthouse.google.com/728344262864753a81ea1a020ba37	https://lighthouse.google.com/728344262864753a81ea1a020ba37
BS_013	Dashboard	Desktop vs Mobile Performance Gap	1. Compare PageSpeed (91) vs Mobile (62). 2. Save draft.	Performance should be consistent.	Significant lag on mobile devices.	Low	Medium	Performance	Web/Mobile		
BS_014	Activity	Incorrect Status Badge for Drafts	1. Open Google PageSpeed Insights tool. 2. Enter the URL of the Sign in page. 3. Select the 'Mobile' tab and run the analysis. 4. Observe the Performance Score and Core Web Vitals (FID, LCP, CLS).	Draft badge. Performance score should be above 90. LCP should be less than 2.5 s and FID should be less than 100 ms for a smooth user experience.	Published badge. Mobile Score: 62. Critical Issues: 1. LCP: 6.9s (Target < 2.5s). 2. Stale JavaScript resources (JS/CSS). 3. Unused JavaScript slowing down execution.	Medium	High	Functional	Web		
BS_015	Sign In Page	High Loading Time on Mobile (62 Score)	1. Open Google PageSpeed Insights tool. 2. Enter the URL of the Sign in page. 3. Select the 'Desktop' tab and run the analysis. 4. Observe the performance metrics.	Performance score should be maintained in the Green zone (90-100) to ensure high desktop efficiency.	Score: 98. Performance is optimal. LCP is 1.1s. No major bottlenecks found on Desktop view.	Medium	High	Performance	Mobile	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c
BS_016	Sign In Page	Desktop Performance Benchmarking	1. Open Google PageSpeed Insights tool. 2. Enter the URL of the Sign in page. 3. Select the 'Desktop' tab and run the analysis. 4. Observe the performance metrics.	Performance score should be maintained in the Green zone (90-100) to ensure high desktop efficiency.	Score: 98. Performance is optimal. LCP is 1.1s. No major bottlenecks found on Desktop view.	Low	N/A	Performance	Web/Desktop	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c
BS_017	Sign In Page	Accessibility: Color Contrast Issue	1. Open the Sign In page on a browser. 2. Use an Accessibility Audit tool or check the Accessibility section in PageSpeed Insights. 3. Look for 'Background and foreground colors do not have a sufficient contrast ratio' warning.	All text and button elements must meet WCAG 2.1 AA standards (at least 4.5:1 contrast ratio) for better readability.	Background and foreground colors do not have a sufficient contrast ratio. Specifically on the "Sign In" button and input labels.	Medium	Medium	UI/UX (Accessibility)	Web/Mobile	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c
Execution Date: 12/5/2026 Version(0.0.2)											
Bug ID	Located	Summary	Steps to Reproduce	Expected Result	Actual Result	Priority	Severity	Issue Type	Platform	Evidence	Reference Link
BUG-001	Forgot Password	Reset Email not received	1. Go to Login 2. Click 'Forgot Password' 3. Enter email & submit	Password reset link should be sent to email.	No email received after multiple attempts.	High	Critical	Functional	Web (Desktop)	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-002	OTP Page	OTP Attempts Logic Error	1. Enter wrong OTP 5 times	System should block the user and reset on 'Resend'.	UI shows 0 attempts remaining; error persists until 'Resend' clicked.	Medium	High	Functional	Web (Desktop)	https://www.bloom.com/en/73085c535a4f136996829b1d72249	
BUG-003	Calendar Page	Calendar is non-interactive	1. Navigate to Calendar 2. Click any date slot	A scheduling modal should open.	Page remains static, no clicks are registered.	High	Critical	Functional	Web (Desktop)	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-004	Jobs Page	Irrelevant Job Results	1. Search "SQA" in Job Role	Only SQA related jobs should appear.	Results include "Cyber Security".	Medium	Medium	Logical	Web (Desktop)	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-005	Dashboard (Mobile)	Sidebar Overflow/Layout	1. Open Dashboard on iPhone 12 Pro view	All sidebar links should be visible and aligned.	'Quick Links' are sticking to the bottom; some buttons hidden.	Medium	High	UI/UX (Responsiveness)	Mobile (Simulator)	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-006	Dashboard	Page Load Delay (LCP)	1. Run PageSpeed Insights on Dashboard	LCP should be under 2.5s.	LCP recorded at 7.2s on Mobile.	Low	Medium	Optimization	Web (Mobile View)	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c	https://lighthouse.google.com/69f2b4e811343aada4692a229bdc0c
BUG-007	Carousel Builder	Carousel generation limit (9/week)	1. Enter topic 2. Click Generate	User should be warned about limits before filling form.	Limit reached error only shows after form submission.	Low	Medium	UX	Web (Desktop)	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-008	Carousel Builder, Topic Input Field	Input field does not wrap or scroll horizontally for long continuous strings	1. Go to Carousel Builder. 2. In the 'Topic' box, type a long string of characters without spaces e.g., 'a' repeated 100 times.	Text should either wrap to a new line or the box should allow horizontal scrolling to see the cursor.	Text expands beyond the right boundary of the input box, making the end of the string and cursor invisible.	Medium	Medium	UI	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-009	Carousel Builder, Topic Input Validation	Validation logic fails to distinguish between words and a single long character string.	1. Enter a single long string of characters e.g., "aaaaaaaaa..." in the Topic field. 2. Observe the error message.	System should detect that "3 words" are not present and keep the field invalid until spaces/words are added.	Even though the red error "at least 3 words" is shown, the system seems to accept the string as input data, causing UI breaking.	Low	Minor	Logical / Functional	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-010	Carousel Editor	Data loss on page refresh	1. Enter text in Carousel Topic/Slides. 2. Refresh page (Cmd + R or Refresh button).	Entered data should be recovered from cache or local storage.	All entered text is cleared; form returns to empty state.	High	High	Functional	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-011	Carousel Editor	No data sync across multiple tabs	1. Enter text in Tab 1. 2. Open the same editor URL in Tab 2.	Data should be saved as a draft and visible in any tab.	Tab 2 shows an empty form despite Tab 1 having active data.	High	High	Functional	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-012	Carousel Editor	Validation Bypass in Preview	1. Enter less than 3 words (e.g., emojis or symbols) in the Body field.	The slide preview should not update or should show a placeholder until valid input is provided.	Preview updates with invalid/short text despite the red validation error.	Medium	Low	Logical	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-013	Carousel Editor	Inaccurate Word Count Logic	1. Enter emojis and symbols in the Body field.	System should not count symbols/emojis as "words" for the 3-word minimum rule.	System detects characters but gives a generic "3 words" error that is easily bypassed.	Low	Low	Logical	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-014	Settings Page	Profile Name/Email is Read-Only	1. Navigate to Settings. 2. Try to click or edit the "Name" or "Email" fields.	Users should be able to update their profile information.	Fields are static text with no edit option available.	High	Medium	Functional Gap	web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-015	Strategy page	Strategy Editor modal resets and loses original data if text is cleared and the popup is closed without saving.	1. Go to the Strategy Page and click on "Edit Strategy" to open the popup. 2. Clear/remove all the existing strategy text. 3. Without clicking "Save" or "Next", directly close the popup modal using the X close button or clicking outside. 4. Reopen the same strategy popup.	The popup should restore and display the original, previously saved strategy text because the modifications were never saved.	The popup opens completely blank, meaning the system cleared the original data from the UI state/cache upon closing, leading to temporary data loss.	High	High	Functional / UX	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-016	Carousel page	Linkable Caption text area box is too small and lacks vertical auto-expand capability, causing text truncation and poor readability.	1. Navigate to the Carousel view. 2. Look at the "Linkable Caption" input field box. 3. Type or view a caption that is longer than 3-4 lines.	The text box should either be dynamic or have a larger default height so the user can easily read the entire caption at a glance without forced scrolling.	The text area is restricted to a fixed, narrow height. Text gets cut off vertically, and the user has to scroll inside a tiny window to review their content.	Medium	Low	UI / UX	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-017	Carousel Editor (Theme Selector)	Significant lag/delay when switching carousel theme colors, with a slow-loading spinner indicating performance bottlenecks.	1. Navigate to Carousel Editor. 2. Click on any theme color circle. 3. Observe the delay in the preview application.	Theme colors should switch instantly (under 100ms) on the local Browsered preview without noticeable lagging.	Slides do not update instantly; a loading spinner appears on the slide for a prolonged period, causing unoptimized rendering or unnecessary network calls.	High	Medium	Optimization	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-018	Carousel Editor (UI Layout)	The loading spinner for color selection is detached and misaligned, appearing at the far right instead of overlaying the active element.	1. Click on a theme color bubble. 2. Observe the visual location of the loading spinner.	The loader should be contextual, overlaying the active color element or centrally over the slide preview area.	The loading spinner renders at the far right edge of the control bar, detached from the color options, harming contextual UX.	Medium	Low	UI / UX Alignment	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b	
BUG-019	Carousel Editor	Clicking a specific color circle unexpectedly shifts selection focus to an adjacent or incorrect color item.	1. Click precisely on a specific color circle. 2. Check which color circle receives the active selection indicator/focus.	The system must maintain a strict index check; the exact color circle clicked by the user must be selected and highlighted.	Selection focus unexpectedly jumps or auto-shifts to an adjacent color bubble, resulting in misattributed user intentions.	High	High	Functional	Web	https://www.bloom.com/en/024890b-4e4115a8d56c8b9921b
