

Module 1: Sign in			Execution Date: 06/05/2026					
ID	Title	Test Scenario	Pre-condition	Steps to reproduce	Expected Result	Actual Result	Status	
TC_SI_001	Valid Login	Verify user can login with valid credentials.	User must be registered.	1. Enter valid email. 2. Enter correct password. 3. Click Sign In.	User should land on the Dashboard.	As expected.	PASS	
TC_SI_002	Invalid Password	Verify login with wrong password.	User must be registered.	1. Enter valid email. 2. Enter wrong password. 3. Click Sign In.	System should show "Invalid Credentials" error.	As expected.	PASS	
TC_SI_003	Missing @ in Email	Verify email validation for missing "@" symbol.	None.	1. Enter "mehvreen@ilkhhar.com". 2. Enter password. 3. Click Sign In.	System should show "Please include an '@' in the email address".	Error not shown.	FAIL	
TC_SI_004	Empty Fields	Verify login button with empty fields.	None.	1. Leave email and password blank. 2. Click Sign In.	Error message "Fields cannot be empty" should appear.	As expected.	PASS	
TC_SI_005	Password Visibility	Verify "Eye" icon functionality.	Password entered.	1. Type password. 2. Click on Eye icon.	Password should change from dots (hidden) to plain text.	As expected.	PASS	
Module 2: Sign Up								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_SU_001	Valid Signup	Verify new user registration.	Email not registered.	1. Enter Name, Email, Password. 2. Click Sign Up.	User should be redirected to OTP page.	As expected.	PASS	
TC_SU_002	Numeric Name	Verify Name field for numeric characters.	None.	1. Enter "12345" in Name field. 2. Fill other fields. 3. Click Sign Up.	System should only allow alphabets in Name.	Numeric values accepted.	FAIL	
TC_SU_003	Weak Password	Verify password strength validation.	None.	1. Enter "123" as password. 2. Click Sign Up.	System should require at least 8 characters.	Password too short.	FAIL	
TC_SU_004	Duplicate Email	Verify signup with already registered email.	Email already exists.	1. Enter registered email. 2. Click Sign Up.	Error "Email already registered" should appear.	As expected.	PASS	
Module 2: OTP Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_OTP_001	Valid OTP	Verify account verification with correct OTP.	OTP sent to email.	1. Enter correct 6-digit code. 2. Click Verify.	Account verified; land on Onboarding.	As expected.	PASS	
TC_OTP_002	Invalid OTP	Verify behavior with incorrect code.	OTP sent to email.	1. Enter "000000". 2. Click Verify.	Error "Incorrect OTP" should appear.	As expected.	PASS	
TC_OTP_003	Resend Timer	Verify Resend OTP button and timer.	OTP sent.	1. Wait for timer to end. 2. Click Resend Code.	New OTP should be sent to the user.	Timer not working.		
Module 3: Continue with google / LinkedIn								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_AUTH_001	Google Popup	Verify Google login popup window.	None.	1. Click "Continue with Google".	A secure Google login popup should open.	As expected.	PASS	
TC_AUTH_002	LinkedIn Redirection	Verify redirection to LinkedIn OAuth.	None.	1. Click "Continue with LinkedIn".	Redirects to LinkedIn authorization page.	As expected.	PASS	
TC_AUTH_003	Cancel Google Auth	Verify behavior when user cancels selection.	Popup open.	1. Close Google popup without selecting.	User stays on Sign In page.	As expected.	PASS	
Module 4: Onboarding Flow (Step 1 to 4)								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_ON_001	Progress Bar 25%	Verify Progress bar on Step 1.	Start Onboarding.	1. Fill Step 1 details. 2. Click Next.	Progress bar should show 25%.	Bar stays at 0%.	FAIL	
TC_ON_002	Max Industry Limit	Verify selection limit for industries.	Step 2.	1. Try to select 10 industries.	Should limit selection to 3-5 only.	Unlimited selection.	FAIL	
TC_ON_003	Step Navigation	Verify "Back" button data persistence.	On Step 3.	1. Click Back to Step 2.	Previously selected data should be visible.	Data cleared.	FAIL	
TC_ON_004	About You Validation	Verify character count in bio	Onboarding Step 1 is open	1. Enter only 5 characters in bio. "Next" button.	System should prompt for at least 50 characters.	System correctly prompts for more words.	PASS	
TC_ON_005	Progress Bar Sync (Step 2)	Verify bar update on Role selection	User is on Step 2	1. Select Roles. 2. Click "Next". 3. Check the progress bar on top.	Progress bar should show 50% or 75%.	Bug: Bar is stuck at 25% (Step 2) for 3 consecutive pages.	FAIL	
TC_ON_006	Selection Limits	Verify max limit for Industries	Industry selection page is open	1. Attempt to select 4 or more industries. 2. Observe the behavior.	System should grey out other options after 3 selections.	Limit is enforced correctly; options are blurred.	PASS	
TC_ON_007	Writing Voice Quiz	Verify Radio Button logic	Onboarding Step 3 (Voice) is open	1. Select different options for "Humor". Observe if only one is picked.	2. Only one radio button should be selectable per question.	Selection logic is working correctly.	PASS	
TC_ON_008	Industry Search	Verify search bar functionality in Step 2	Step 2 is open.	1. Type "Software" in the search box. 1. Select "Founder". 2. Click it again.	Only industries related to "Software" should be displayed.	Working fine.	PASS	
TC_ON_009	Role Deselection	Verify if user can deselect a role.	Step 1 is open.	1. Select "Build Authority".	The role should be deselected (if allowed by UI).	As expected.	PASS	
TC_ON_010	Multi-Goal Selection	Verify if user can select multiple goals.	Step 3 is open.	2. Select "Generate Leads".	Both goals should be highlighted/selected.	Working fine.	PASS	
TC_ON_011	Progress Bar 100%	Verify bar status on final step.	Step 4 is open.	1. Answer all quiz questions. 2. Check top bar.	Progress bar should show 100% or be at the end.	Bar is stuck at 75%.	FAIL	
TC_ON_012	Skip Quiz	Verify if mandatory quiz questions can be skipped.	Step 4 is open	1. Leave quiz questions empty. 2. Click "Generate My Strategy".	System should show "Please answer all questions" error.	Allowed to skip.	FAIL	
Module 5: Home								
TC_HM_001	Greeting Logic (Morning)	Verify time-based greeting in the morning.	System time is between 5 AM - 12 PM.	1. Log in to the dashboard. 2. Observe the greeting text.	Should show 'Good Morning, [Name]'.	Working fine.	PASS	
TC_HM_002	Greeting Logic (Night)	Verify time-based greeting at night.	System time is after 8 PM.	1. Log in to the dashboard. 2. Observe the greeting text.	Should show 'Good Evening, [Name]'.	Showing 'Good Morning'.	FAIL	
TC_HM_003	Feedback Banner UI	Verify visibility of the feedback banner.	User has completed onboarding.	1. Navigate to Home Page.	Banner asking for feedback should be visible.	Visible.	PASS	
TC_HM_004	Banner 'X' Button	Verify 'X' button functionality on banner.	Feedback banner is visible.	1. Click the 'X' button to close.	Banner should close immediately without page refresh.	Bug: Clicking 'X' triggers info icon behind it.	FAIL	
TC_HM_005	Walkthrough Video	Verify video popup functionality.	Info (i) icon is visible.	1. Click on the info icon.	A popup window with the walkthrough video should open.	Popup opens correctly.	PASS	
TC_HM_006	Video Playback	Verify if video plays smoothly.	Video popup is open.	1. Click the 'Play' button.	Video should start playing with audio.	Video is playing.	PASS	
TC_HM_007	Generate Post Link	Verify redirection to Editor via main CTA.	Dashboard loaded.	1. Click 'Generate Post' button.	Should redirect user to the Post Editor page.	Successfully redirected.	PASS	
TC_HM_008	Strategy Sync	Verify content pillars on Home vs Strategy tab.	Strategy is generated.	1. Compare 'Content Pillars' on Home with Strategy tab.	Both should display the exact same 4 pillars.	Data is synced.	PASS	
TC_HM_009	Empty Ideas State	Verify UI when no ideas are generated yet.	New user with no strategy.	1. Navigate to Home.	Should show a placeholder or 'Generate Strategy' prompt.	Showing blank space.	FAIL	
TC_HM_010	Post Ideas Loading	Verify if weekly ideas are visible.	Strategy is active.	1. Scroll to the 'Ideas for you' section.	3-4 AI generated ideas should be visible as cards.	Ideas are visible.	PASS	
TC_HM_011	Quick Navigate: Activity	Verify redirection to Activity page.	Sidebar visible.	1. Click on 'Activity' icon.	Should navigate to /activity without lag.	Navigation is smooth.	PASS	
TC_HM_012	Mobile View: Overlap	Verify UI on small screens (iPhone SE).	Mobile Simulator active.	1. View Home page on 375px width.	Elements should not overlap (e.g., Video icon on text).	UI Bug: Icons are overlapping on text.	FAIL	

TC_HM_013	User Name Accuracy	Verify if the correct user name is displayed.	Logged in as 'Mehtreen'.	1. Check greeting name.	Should say 'Mehtreen', not 'User' or blank.	Name is correct.	PASS	
TC_HM_014	Data Refresh	Verify dashboard after manual refresh.	Dashboard open.	1. Press F5 (Reload).	All charts and ideas should reload correctly.	Working fine.	PASS	
TC_HM_015	Logout Redirection	Verify session end from Home.	Profile menu open.	1. Click 'Sign Out'.	Should clear session and redirect to Login page.	Redirects correctly.	PASS	
TC_ED_016	AI Writing Logic	Verify auto-generation of content.	Editor open.	1. Wait 3 seconds.	AI should write Hook, Body, Hashtags.	Working fine.	PASS	
TC_ED_017	Manual Editing	Verify if text area is editable.	AI content generated.	1. Type manually in editor.	Text should be editable.	Working.	PASS	
TC_ED_018	Save Button Functionality	Verify saving post draft.	Post ready.	1. Click 'Save' button.	Post should be saved; success message shown.	Bug: Save button unresponsive.	FAIL	
TC_ED_019	Formatting Toolbar	Verify Bold/Italic tools.	Text selected.	1. Check for toolbar.	Toolbar should appear.	Toolbar missing.	PASS	
TC_ED_020	Make it Shorter	Verify AI shortening logic.	Refine options open.	1. Click 'Make it shorter'.	AI should summarize.	Refined correctly.	PASS	
TC_ED_021	Unsaved Changes Warning	Verify alert on exit.	Edited content present.	1. Click Sidebar icon.	Alert: 'Unsaved changes' should appear.	Redirects without warning.	FAIL	
TC_ED_020	Custom Refine Input	Verify AI response to feedback.	Refine box open.	1. Type 'Add emojis'.	AI should update post.	Ignoring feedback.	FAIL	
Module 6: Ideas Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_ID_001	Idea Generation Logic	Verify if ideas match selected pillars.	Strategy exists.	1. Navigate to Ideas Page. 2. Compare idea topics with selected pillars.	Ideas should strictly relate to the 4 content pillars chosen in onboarding.	Working fine.	PASS	
TC_ID_002	Weekly Idea Cards	Verify the number of ideas displayed.	Strategy generated.	1. Count the visible idea cards.	System should display a set of weekly ideas (e.g., 5-7 ideas).	Only 3 ideas shown.	FAIL	
TC_ID_003	Skip Functionality	Verify 'Skip' button on an idea.	Idea card visible.	1. Click 'Skip' button on an idea.	The current idea should be replaced by a new AI-generated idea.	Takes too long to reload.	FAIL	
TC_ID_004	Skip Limit	Verify if there is a limit to skipping ideas.	User has skipped 10 ideas.	1. Try to click 'Skip' again. 1. Type "Quantum Computing" in search.	System should show a limit reached message or prompt to wait.	No limit enforced.	FAIL	
TC_ID_005	Custom Topic Input	Verify AI suggestion for custom topics.	Custom input field visible.	2. Click 'Generate'.	AI should suggest a post idea specifically for the custom topic.	Generated successfully.	PASS	
TC_ID_006	Empty Custom Search	Verify validation for blank custom search.	Search bar is empty.	1. Click 'Generate' without typing.	System should show "Please enter a topic" error.	No error message.	FAIL	
TC_ID_007	Generate Button	Verify redirection to Editor from Idea.	Idea card visible.	1. Click 'Generate' button on a card.	Should redirect to Editor with that specific idea's context.	Successfully redirected.	PASS	
TC_ID_008	Idea Content Quality	Verify if idea titles are professional.	Ideas loaded.	1. Read through idea titles/descriptions.	Titles should be meaningful and not gibberish.	Content quality is good.	PASS	
TC_ID_009	Ideas Loader UI	Verify skeleton loader during generation.	Click 'Generate' for new ideas.	1. Observe the screen while AI works.	A skeleton loader or "Thinking" animation should appear.	Screen goes white.	FAIL	
TC_ID_010	Mobile Layout	Verify idea card alignment on mobile.	Mobile Simulator (375px).	1. Scroll through ideas on mobile view.	Cards should be stacked vertically and not overflow.	Card text is cutting off.	FAIL	
Module 7: Carousel Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_CR_001	Template Selection	Verify if templates change the UI globally.	Carousel editor open.	1. Click on "Modern Dark" template.	All slides should update to the new color and font theme instantly.	Working fine.	PASS	
TC_CR_002	Slide Addition	Verify adding a new slide in between.	User has 3 slides.	2. Observe all slides. 1. Click the "+" button between slide 1 and 2.	A new blank slide should be inserted at position 2.	Successfully added.	PASS	
TC_CR_003	PDF Export	Verify PDF download functionality.	Carousel is ready.	1. Click "Download PDF".	System should generate a high-quality multi-page PDF.	Bug: Download fails on Chrome.	FAIL	
TC_CR_004	Branding Toggle	Verify if Logo/Name can be hidden.	Branding settings open.	1. Toggle "Show Profile Picture" to OFF.	Profile picture should be removed from all slides.	As expected.	PASS	
TC_CR_005	Text Overflow	Verify text wrap logic on slides.	Slide text area open.	1. Paste a very long headline (100+ chars).	Text should automatically resize or wrap within the slide boundaries.	UI Bug: Text bleeds out of slide.	FAIL	
TC_CR_006	Custom Color Picker	Verify brand color customization.	Color picker visible.	1. Enter hex code #11CAA0.	All accent elements (lines/dots) should change to that specific color.	Working fine.	PASS	
TC_CR_007	Slide Deletion	Verify removing a slide.	User has 5 slides.	1. Click the "Trash" icon on slide 3.	Slide 3 should be removed and remaining slides re-indexed.	Indexing is correct.	PASS	
TC_CR_008	Content Sync	Verify if post text maps to slides correctly.	Redirected from Editor.	2. Observe the text on slides.	The AI post should be logically split (e.g., Hook on Slide 1).	Text is messy on slides.	FAIL	
TC_CR_009	Image Quality	Verify profile image resolution on export.	PDF downloaded.	1. Open the downloaded PDF.	The image should be crisp and not pixelated.	Image is blurry in PDF.	FAIL	
TC_CR_010	Mobile Edit View	Verify builder responsiveness.	Mobile Simulator (375px).	1. Try to edit slide text on mobile. 2. Zoom into the profile picture.	User should be able to click and type without the keyboard hiding the field.	Keyboard overlaps text area.	FAIL	
Module 8: Calendar Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_CAL_001	Default Month View	Verify if the current month is displayed by default.	Calendar page is opened.	1. Navigate to the Calendar tab.	The system should display the current month (e.g., May 2026).	Working fine.	PASS	
TC_CAL_002	Month Navigation	Verify switching between months.	Calendar page is open.	1. Click the ">" (Next) arrow button.	The calendar should navigate to June 2026 correctly.	Navigation is smooth.	PASS	
TC_CAL_003	Today's Highlight	Verify if the current date is highlighted.	Calendar page is open.	1. Check the background color of today's date.	Today's date (e.g., May 10) should have a distinct highlight color.	Correctly highlighted.	PASS	
TC_CAL_004	Post Indicator	Verify visibility of scheduled posts on date cards.	A post is scheduled for May 15.	1. Observe the date card for May 15.	A dot or small title label should indicate a post is scheduled.	Indicator is visible.	PASS	
TC_CAL_005	Post Detail Popup	Verify clicking on a scheduled post.	Post indicator is visible.	1. Click on the post label on a specific date.	A small popup or sidebar should open showing the post preview.	Popup is not opening.	FAIL	
TC_CAL_006	Empty Date Action	Verify clicking on an empty date.	Date has no scheduled post.	1. Click on an empty date card (e.g., May 20).	Should show an option/button to "Schedule a New Post".	Button is missing.	FAIL	
TC_CAL_007	Draft vs Published	Verify color coding for different post statuses.	One draft and one published post.	1. Check the legend/colors on the calendar.	Drafts should be Grey and Published should be Purple (as per UI).	Colors are mixed up.	FAIL	
TC_CAL_008	Drag and Drop	Verify rescheduling via drag and drop.	Post is scheduled for May 12.	1. Drag the post from May 12 to May 14.	The post should be rescheduled to May 14 automatically.	Drag & drop not working.	FAIL	
TC_CAL_009	Leap Year Check	Verify February dates for leap years.	Year is 2028 (Leap Year).	1. Navigate to February 2028.	The calendar should correctly show 29 days.	Working fine.	PASS	
TC_CAL_010	Mobile Calendar View	Verify layout on small screens.	Mobile Simulator (375px).	1. Scroll through the calendar on mobile.	The calendar should switch to a "List View" or a responsive grid.	UI Bug: Grid is broken.	FAIL	
Module 9: Activity Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_AC_001	Post Feed Loading	Verify if saved posts appear in the list.	User has saved at least 1 post.	1. Navigate to Activity Page.	The page should display a list/cards of all saved and scheduled post	Working fine.	PASS	
TC_AC_002	Status Badge: Draft	Verify color coding for 'Draft' status.	Post is saved but not scheduled.	1. Observe the status label on the post card.	Should show a "Draft" badge (e.g., Grey or Blue).	Badge is correct.	PASS	
TC_AC_003	Status Badge: Scheduled	Verify color coding for 'Scheduled'.	Post is scheduled in calendar.	1. Observe the status label.	Should show "Scheduled" badge (e.g., Purple/Green).	Bug: Shows 'Draft' instead.	FAIL	
TC_AC_004	Search Functionality	Verify search by post title/keywords.	Multiple posts in activity.	1. Type a word from a post title in the search bar.	The list should filter to show only matching posts.	Bug: Search is case-sensitive.	FAIL	
TC_AC_005	Filter by Status	Verify filtering logic for Drafts/Scheduled.	Mix of posts available.	1. Select "Scheduled" from the dropdown filter.	Only scheduled posts should be visible in the list.	Working fine.	PASS	
TC_AC_006	Edit From Activity	Verify redirection to Editor for drafts.	A 'Draft' post is visible.	1. Click on the "Edit" (Pencil) icon on a draft.	Should redirect to the Editor with the post content pre-filled.	Redirects correctly.	PASS	
TC_AC_007	Delete Post Logic	Verify removing a post from history.	Post exists in activity.	1. Click the 'Delete' (Trash) icon. 2. Confirm the prompt.	Post should be removed from the list and database.	Working fine.	PASS	
TC_AC_008	Pagination / Infinite Scroll	Verify loading of older posts.	User has 50+ posts.	1. Scroll to the bottom of the page.	More posts should load automatically or via "Load More" button.	Bug: Page hangs on scroll.	FAIL	
TC_AC_009	Empty State UI	Verify UI when no posts exist.	New user with no history.	1. Navigate to Activity page.	Should show a "No posts found" message with a "Create Post" CT/ Showing a blank white screen.		FAIL	
TC_AC_010	Mobile List Layout	Verify post cards on mobile screens.	Mobile Simulator (375px).	1. Check the alignment of post titles and status badges.	Badges and buttons should not overlap; text should be readable.	UI Bug: Buttons are overlapping.	FAIL	
Module 10: Engage Page								
TC_EN_001	Keyword Search	Verify search by niche keywords.	Engage page is open.	1. Enter "Software Testing" in the search bar. 2. Click 'Search'.	System should fetch and display relevant LinkedIn profiles or post	Working fine.	PASS	
TC_EN_002	Empty Search Validation	Verify UI when no keywords are entered.	Search field is blank.	1. Click 'Search' without typing any text.	Should show a validation message: "Please enter a keyword to sear	No error message.	FAIL	
TC_EN_003	Country Filter	Verify results based on country selection.	Search active.	1. Select "Pakistan" from the country dropdown.	Results should be filtered to show only profiles/posts from Pakistan	Bug: Filter is not applying.	FAIL	

TC_EN_004	Category Filter	Verify results based on professional category.	Search active.	1. Select "Technology" from category filter.	Should filter results to show only tech-related networking options.	Working fine.	PASS	
TC_EN_005	Favorite/Bookmark	Verify "Star" functionality on profiles.	Search results visible.	1. Click the "Star" icon on a specific profile.	Profile should be added to the "Favorites" tab for quick access.	Bug: Star icon is not clickable.	FAIL	
TC_EN_006	LinkedIn Redirection	Verify "View Profile" button link.	Search results visible.	1. Click on "View on LinkedIn" for a result.	Should open that specific LinkedIn profile in a new browser tab.	Opens in the same tab.	FAIL	
TC_EN_007	Search Speed / Loading	Verify skeleton loader during search.	Clicking search button.	1. Observe the screen while results are fetching.	A professional loading state (shimmer/skeleton) should be visible.	Screen freezes for 3 seconds.	FAIL	
TC_EN_008	Pagination Check	Verify loading of next set of results.	10 results displayed.	1. Scroll to the bottom of the search results.	More results should load automatically (Infinite scroll).	Bug: No more results load.	FAIL	
TC_EN_009	Special Characters Search	Verify search with symbols.	Search field open.	1. Enter "S@QA#" in the search bar.	System should sanitize input and show "No results found" or relevant results.	System crashes.	FAIL	
TC_EN_010	Mobile Layout	Verify filter visibility on mobile.	Mobile Simulator (375px).	1. Open Engage page on mobile.	Search bar and filters should be stacked and easy to tap.	UI Bug: Filters are overlapping.	FAIL	
Module 11: Strategy Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_ST_001	Pillars Data Accuracy	Verify if selected pillars match onboarding.	Onboarding complete.	1. Navigate to Strategy Page. 2. Check the "Content Pillars" section.	Should display the exact pillars chosen during the onboarding process.	Perfectly synced.	PASS	
TC_ST_002	Voice DNA Radar Chart	Verify if the Radar chart renders correctly.	Strategy generated.	1. Observe the "Voice DNA" chart.	A Radar/Spider chart should show tone attributes (e.g., Professional, Witty).	Chart is visible and accurate.	PASS	
TC_ST_003	Chart Responsiveness	Verify chart behavior on hover.	Strategy page open.	1. Hover over the data points on the Radar chart.	Tooltips should appear showing the exact percentage/value for each tone.	Bug: Chart is static (No tooltips).	FAIL	
TC_ST_004	Edit Strategy Link	Verify "Edit Strategy" button redirection.	Strategy page open.	1. Click the "Edit Strategy" button.	Should take the user back to Step 1 of Onboarding to redo the process.	Bug: Redirects to Home instead.	FAIL	
TC_ST_005	Content Guardrails	Verify "Topics to Avoid" visibility.	Guardrails defined in AI.	1. Scroll to the "Guardrails" section.	Should list forbidden topics or phrases the AI must avoid.	Guardrails are listed correctly.	PASS	
TC_ST_006	Target Audience UI	Verify audience demographic display.	Audience data available.	1. Check the "Target Audience" section.	Should show clear tags or icons for the target professional roles.	Working fine.	PASS	
TC_ST_007	Strategy Download	Verify "Download Strategy" as PDF.	Strategy page open.	1. Click "Download" (if available).	Should generate a PDF summary of the user's AI strategy.	Bug: PDF formatting is broken.	FAIL	
TC_ST_008	Dynamic Pillars Toggle	Verify if pillars can be toggled/deactivated.	Strategy page open.	1. Click the "Deactivate" icon on a pillar.	Pillar should be greyed out and not used for future idea generation.	Toggle logic is working.	PASS	
TC_ST_009	Strategy Loading State	Verify UI while AI builds the strategy.	Just finished onboarding.	1. Wait for the strategy to load.	Should show a professional "Analyzing your Voice..." loader.	Screen is blank for 5 seconds.	FAIL	
TC_ST_010	Mobile Layout: Charts	Verify chart visibility on mobile.	Mobile Simulator (375px).	1. Scroll to the Radar chart on mobile.	The chart should resize to fit the screen width without cutting labels.	UI Bug: Chart labels are cut off.	FAIL	
Module 12: Feedback Page								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_FB_001	Popup Trigger Logic	Verify if popup appears after post generation.	User generates their first post.	1. Finish generating a post. 2. Wait 2 seconds.	Feedback popup should automatically appear.	Working fine.	PASS	
TC_FB_002	Star Rating Selection	Verify if user can select 1 to 5 stars.	Feedback popup is open.	1. Click on the 4th star.	4 stars should be highlighted, and the 5th should remain dull.	Stars are not clickable.	FAIL	
TC_FB_003	Dynamic Emoji Change	Verify if emoji changes with star rating.	Feedback popup is open.	1. Click 1 star (Sad). 2. Click 5 stars (Happy).	The emoji or text label should change based on the rating.	Emoji is static.	FAIL	
TC_FB_004	Comment Box Character Limit	Verify max length for written feedback.	Feedback popup is open.	1. Paste 1000 characters in the text box.	Should limit to 250-500 chars or show a counter.	No limit enforced.	FAIL	
TC_FB_005	Mandatory vs Optional	Verify submission without comments.	5 stars selected.	1. Leave comment box empty. 2. Click "Submit".	Should allow submission (Rating is mandatory, text is optional).	Working fine.	PASS	
TC_FB_006	"X" Close Button	Verify closing the popup without submitting.	Feedback popup is open.	1. Click the "X" button at the top right.	Popup should close and not appear again in the same session.	Bug: Popup reappears on every page refresh.	FAIL	
TC_FB_007	Submit Button State	Verify button is disabled until rating is picked.	Popup just opened.	1. Look at "Submit" button before clicking any star.	Button should be disabled (greyed out).	Button is enabled.	FAIL	
TC_FB_008	Thank You Message	Verify UI after successful submission.	Rating and comment entered.	1. Click "Submit".	Should show a "Thank you for your feedback!" success message.	Message is visible.	PASS	
TC_FB_009	Background Dimming	Verify if background is non-interactable.	Feedback popup is open.	1. Try to click a sidebar icon while popup is open.	Background should be dimmed/blurred and non-clickable.	Background is clickable.	FAIL	
TC_FB_010	Mobile Responsiveness	Verify popup layout on small screens.	Mobile Simulator (375px).	1. Open popup on mobile view.	Text box and stars should fit within the screen without scrolling.	UI Bug: "Submit" button is cut off.	FAIL	
Module 13: Sidebar								
ID	Title	Test Scenario	Pre-condition	Steps to Reproduce	Expected Result	Actual Result	Status	
TC_SB_001	Active Link Highlight	Verify if the current page is highlighted.	User is on 'Strategy' page.	1. Observe the Sidebar icons.	The 'Strategy' icon should have a distinct color/background (e.g., Purple).	Working fine.	PASS	
TC_SB_002	Sidebar Collapse	Verify shrinking logic for the sidebar.	Any page is open.	1. Click the 'Collapse' (Arrow) icon.	Sidebar should shrink to icons-only view.	Working fine.	PASS	
TC_SB_003	Sidebar Expand	Verify expansion logic.	Sidebar is collapsed.	1. Click the 'Expand' arrow.	Sidebar should show full labels with icons.	Transitions are smooth.	PASS	
TC_SB_004	Logo Redirection	Verify clicking on the App Logo.	User is on 'Engage' page.	1. Click the 'Consistly.ai' logo at the top.	System should redirect the user back to the Home/Dashboard.	Redirects correctly.	PASS	
TC_SB_005	Profile Dropdown Visibility	Verify visibility of user settings.	Dashboard open.	1. Click on the Profile Name/Avatar.	A dropdown menu should appear with 'Settings' and 'Logout'.	Menu opens correctly.	PASS	
TC_SB_006	Logout Functionality	Verify session termination.	User is logged in.	1. Click 'Logout' from the dropdown.	User should be redirected to Sign In page; session should clear.	Working fine.	PASS	
TC_SB_007	Navigation Consistency	Verify clicking all links one by one.	Dashboard open.	1. Click Ideas -> Calendar -> Strategy -> Engage.	Each click should navigate to the correct URL without errors.	Navigation is active.	PASS	
TC_SB_008	Tooltip on Collapse	Verify tooltips when sidebar is shrunk.	Sidebar is collapsed.	1. Hover over the 'Ideas' icon.	A small tooltip saying 'Ideas' should appear.	Bug: Tooltips are missing.	FAIL	
TC_SB_009	Scrollable Sidebar	Verify behavior with long menu items.	Small screen resolution.	1. Resize browser height.	Sidebar should be scrollable if items exceed height.	UI Bug: Bottom items are cut off.	FAIL	
TC_SB_010	Mobile Hamburger Menu	Verify sidebar on mobile view.	Mobile Simulator (375px).	1. Click the Hamburger (Menu) icon.	Sidebar should slide in as an overlay.	Working fine.	PASS	
TC_SB_011	Settings Redirection	Verify 'Settings' page access.	Profile dropdown open.	1. Click 'Settings'.	Should redirect to /settings correctly.	Redirects correctly.	PASS	
TC_SB_012	External Links	Verify LinkedIn/Social icons in footer.	Scroll to bottom of sidebar.	1. Click on the LinkedIn icon.	Should open LinkedIn page in a new tab.	Opens in same tab.	FAIL	
TC_SB_013	Branding Logo Visibility	Verify logo rendering in dark/light mode.	Toggle theme.	1. Switch between modes.	Logo should be visible in both themes.	Working fine.	PASS	
TC_SB_014	Session Persistence	Verify sidebar state after refresh.	Sidebar is collapsed.	1. Refresh the page.	Sidebar should remain collapsed.	Resets to expanded.	FAIL	
TC_SB_015	Quick Action Button	Verify if '+' button exists for quick post.	Dashboard open.	1. Look for a '+' or 'Create' button in sidebar.	Button should allow quick post creation.	Button is missing.	FAIL
